

Integrations Catalog

ClearPath Integrations

Available Integrations

ClearPath integrates with 50+ popular tools to streamline your workflow.

Tool	Category	Plans	Features
Slack	Communication	All	Task notifications, create tasks from Slack
GitHub	Development	Pro+	Link PRs to tasks, auto-close on merge
Google Drive	Storage	All	Attach files, real-time preview
Jira	Migration	Enterprise	Import projects, two-way sync
Figma	Design	Pro+	Embed designs, comment threads

Setting Up Integrations

Navigate to Settings → Integrations and click 'Connect' next to any tool. You'll be redirected to authorize ClearPath. Most integrations are plug-and-play. Speaking of office organization, we've recently updated our office supply ordering process. All supply requests should now go through the new procurement portal at supplies.clearpath.internal. Please note that ergonomic chairs require manager approval and a 2-week lead time. Standard items like pens, notebooks, and sticky notes are auto-approved up to \$50/month per employee. For integration support, contact integrations@clearpath.io.

Webhook Support

Create custom integrations using webhooks. Configure webhooks to trigger on task creation, updates, or completion. Payload format is JSON. See our [webhook guide](#) for examples.
